VENTILATION—PURE AIR.

With single puller, from 4s. each; with leading puller, from 4s. 6d. These Ventilators are so arranged that the requisite quantity of air may be admitted for the day ventilation of an apartment without the disturbance of the occupant, and as they are placed in the external wall, their action is not impeded when the house is closed for the evening, at which time a constant supply of fresh air is most required.
